

*“I am excited to be able to fully invest myself into an initiative and community that I am so passionate about. I am also looking forward to applying myself towards a deeper understanding of community-driven development.”*

# Jason Fitzpatrick

*Antigonish, NS*

Throughout the upcoming year I will help build on the efforts of active citizens in the Antigonish climate justice movement. There are many groups in the Antigonish area involved in various approaches to climate change. It is my hope to strengthen the connections between these groups while also opening up avenues for new voices to be heard in this essential movement.

The climate justice community is an extremely active and progressive community in Antigonish. I have been privileged to work with them over the past four years while at StFX, with our connections deepening over the past year in particular. This community is driven by values and a confidence in their ability to be change-makers; I am honoured and excited to work with them over the year ahead.
